Fundamentals of Data Management
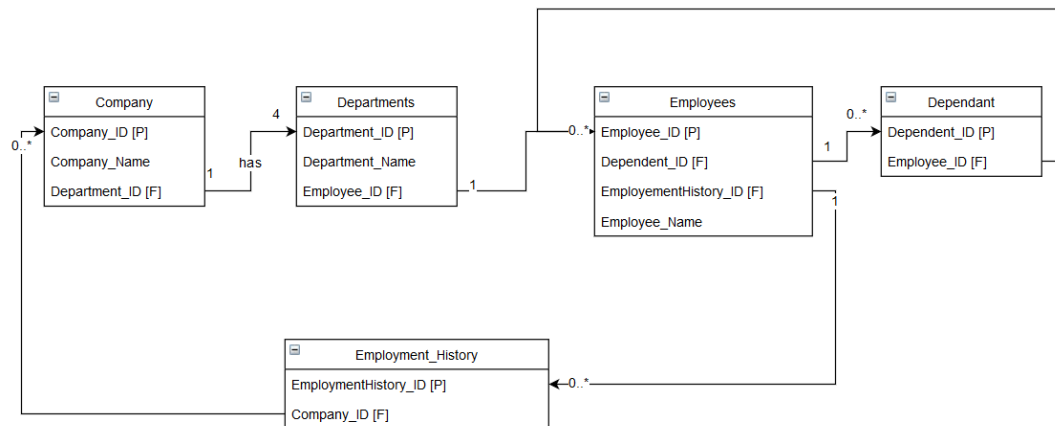

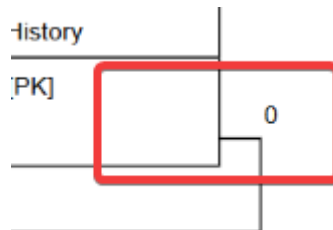

Past Task 3.1.5v2

Version 2: Dependent is now an entity instead of an attribute

The relational entity diagram for the 3.1.5 can be described with the following:

Note that the Company to Employment History may not be just 0 depending on the interpretation:

- Zero: A company cannot have an employment history, but an employment history has many companies;
- OR
- Many: A company may belong on many employment Histories, and an Employment History may have many companies (many to many)
